Skills

- TypeScript
- React
- PostgreSQL

- Ruby on Rails
- Web APIs
- GraphQL

- Web Development
- Node.js
- Git

Experience

Health IQ · San Diego, CA   May 2019 - Present
SOFTWARE ENGINEER (MAY 2019 - PRESENT)
- Developed a new innovative CRM web application (built using React + Node.js) to enable 250+ sales agents and SDRs through the entire sales process
- Worked in a cross -functional team with designers, QA engineers, product managers, and other business folks to define product enhancements and develop new features in an agile development cycle
- Designed, implemented, and successfully delivered new features that increased revenue by enabling entirely new lines of business and integrating with web APIs for improvements to existing web applications
- Created documentation for new systems and led the onboarding process for new developers that enabled the engineering team to double in size

PriceWaterhouseCoopers · San Francisco, CA   June 2015 – July 2018
EXPERIENCED ASSOCIATE (AUG 2016 – JULY 2018)
- Spearheaded development and delivery of 5 mobile app projects on iOS and Android for over 6 million users
- Collaborated with engineering teams to drive understanding and implementation of technical requirements
- Drove all scrum meetings with engineering team and stakeholders, ensuring successful delivery of sprint commitments
TECHNOLOGY CONSULTANT INTERN (JUNE 2015 – AUG 2015)
- Designed and developed a working prototype of an Android mobile application built to identify heart irregularities from a wearable device

Projects

Qraft · Team of 5   November 2018 - December 2018
Qraft is a web application to publish interesting DIY projects and review projects uploaded by other users
- Utilized ReactJS and Redux on the frontend to build a responsive web application for viewing, creating, and reviewing DIY projects
- Developed web APIs with NodeJS and Express that connected with a PostgreSQL database to retrieve data
- Used Auth0 for authentication and AWS S3 for image storage
